

# 17 – Guitar Worship - 17

## Lesson 17 – Switching keys.

- At some point you will need to be able to switch back and forth between different keys. Maybe the song uses a key that is too high or too low for you. Or someone you play with is used to using a different key.
- When you are used to playing by ear this will come easy on you.
- Sometimes in the same song you go from one key to the next key up. Going up one key is normal, going down one key does not really happen because it does not feel natural.
- Sometimes one song uses two different keys.
- You will always use the concept 1, 4, 5 as the basic chords for a certain key as we learned in lesson 3.
- In lesson 8 you already changed the song ‘since I started’ from the key of G to the key of A on your own.
- The first song will go from the key of D to the key of E.  
The second song goes from the key of C to the key of D.  
The third song will have a key change inside as part of the song.
- When using more than one key in a song, each key accesses the whole basic pattern associated with that key, 1, 4, 5 6m, 2m.
